Dot .Net Core and Progressive Web Application Practical
Practical – VIII

Roll No.: T006	Name: Nandini Chaudhary
Class: TYIT	Batch:01
Date of Assignment: 06-08-2026	Date/Time of Submission: 06-08-2026

a. Create an HTML page that would be the starting point of the application. This HTML will contain a link to the file named manifest.json. This is an important file that would be created in the next step.

Code:-

Index.chatml:-

```
<h2>Student Record</h2>
<button onclick="loadStudent()">Load Student</button>
<p id="data"></p>
<script>
    function loadStudent() {
        fetch("/api/student")
            .then(response => response.json())
            .then(student => {
                document.getElementById("data").innerHTML =
                    "Roll No : " + student.rollNo +
                    "<br>Name : " + student.name;
            });
    }
</script>
```

Manifest.json:-

```
{
  "name": "Student PWA",
  "short_name": "Student",
  "start_url": "/",
  "display": "standalone"
}
```

Layout.Cshtml:-

inside the <head> section

```
<link rel="manifest" href="/manifest.json">
```

Output:-

b. Create a simple Web API that returns Student data in JSON format.**Code:-****Student Model(Student.cs):-**

```
namespace StudentPWA.Models
{
    public class Student
    {
        public int RollNo { get; set; }
        public string Name { get; set; }
    }
}
```

API Controller(Choose API Controller - Empty)**StudentController.cs:-**

```
using Microsoft.AspNetCore.Mvc;
namespace StudentPWA.Controllers
{
    [ApiController]
    [Route("api/[controller]")]
    public class StudentController : ControllerBase
    {
        [HttpGet]
        public IActionResult Get()
        {
            return Ok(new
            {
                RollNo = 6,
                Name = "Nandini"
            });
        }
    }
}
```

Step: run (open <https://localhost:7124>) its your portal no. and add this (/api/student)

Output:-

```
Pretty-print ☐
{"rollNo":6,"name":"Nandini"}
```
